Summary

Software Engineer with proven experience in designing, developing, and deploying scalable, full-stack web applications. Expert in React, Node.js, and cloud-native technologies, with a strong focus on system architecture, API design, and performance optimization. Seeking to leverage my skills in a challenging role to build innovative and impactful products.

Experience

Full-Stack Developer

Giant Tech Solutions LLC

Wyoming, US (Remote)

Dec 2024 – Jul 2025

- Architected and deployed a scalable full-stack application using Next.js, Express.js, and MongoDB,
- Engineered robust RESTful APIs and integrated (LLMs) to power intelligent, real-time features.
- Implemented and maintained a comprehensive CI/CD pipeline with GitHub Actions and Docker.

Projects

Typing Platform

Live Demo

- Engineered a full-stack typing application with real-time AI-driven practice and analytics, using Next.js, Node.js, and WebSockets to achieve sub-100ms latency for user feedback.
- Designed a scalable backend on Vercel to handle 1000+ concurrent users while tracking detailed performance metrics to personalize the learning experience.

PassGeni

Live Demo

- Developed a secure, AI-enhanced password generator with React and a Node.js REST API, incorporating modern cryptographic algorithms to ensure high-entropy password creation.

Z-Graphics Mobile App

Live Demo

- Built a cross-platform mobile application using React Native and Expo, integrating the Stripe payment gateway for secure transactions and a real-time admin dashboard.
